

# Which bin?

## GREEN FOOD & GARDEN ORGANICS BIN

The 240-litre green-lidded bin is for weekly collection of organic waste materials such as all food and garden waste and untreated timber. Green waste is transported to the Organic Resource Recovery Facility (ORRF) at Cairncross. The material from the green bins collected from the kerbside along with other mulched bulk green organics, is shredded and mixed with bio-solids. After processing, the end product is a rich, nutrient-filled compost perfect for your garden.

Did you know all food waste goes in the green bin?

### GREEN BIN

- ✓ All food waste and scraps
- ✓ Meat, chicken, fish, shellfish
- ✓ Tea bags, coffee grounds
- ✓ Garden waste: lawn clippings, prunings, small sticks, twigs and flowers
- ✓ Shredded paper, paper towel, serviettes
- ✗ **NO plastic bags, food packaging or recyclables.**

### GREEN BIN TIPS

- > *DO NOT place plastic bags in your green bin. Compostable material in plastic bags cannot be processed. Use only Council supplied compostable cornstarch bags.*
- > *Compost, the end result of green waste recycling, can be purchased from the Organic Resource Recovery Facility (ORRF) at Cairncross and used on your garden.*

Choose green and yellow first, so your red bin won't burst!

# Which bin? Green food and garden organics bin
